

Small pooling and subsequent leakage of water in these 4 internal corners.

Enough to be a nuisance and have to leave a towel on the floor the one time

it rained (water came through 3 of the corners)

The end 'doors' and one on the back only have zips that come down the sides of the door and not across the bottom (only a Velcro patch), this allows/allowed the breeze to come through and into the tent (not air tight)

Overall thoughts:

Amazing space, excellent internal head space (I'm only 5'7" though!!)

Held up extremely well even in quite strong coastal winds when other campers were having some issues

Very easy set-up and pack-up (my wife and I do it)

No moisture coming through floor

Excellent ventilation

The awning area is an excellent space which provided good shading

We set up a 'Oztrail Anywhere Bed Queen' and a porta-cot in one end room, in the other end room we had 2 x Oztrail stretcher bunks so that you could walk into the room and have a stretcher running on either side of the room (not many tents on the market had a large enough end room to facilitate this – this was a key factor in selecting this tent for us – 4 kids!!)

Vertical walls just allow so much more space and are so much more practical!!

Overall, would be happy to recommend this tent to others
